

How Ontario's Ministry of Health Systematized Innovation with ISO 56002

Challenge

- Innovation was often perceived as risk rather than value creation
- Need for a repeatable and measurable innovation process
- Strengthening executive support and employee engagement in innovation

Strategic Pivot

- The Ontario Ministry of Health adopted the ISO 56002 innovation management framework and leveraged HYPE to embed innovation into everyday operations through a structured, scalable, and repeatable process.

Final Thought

“HYPE was essential in evolving our innovation program into a systematic, repeatable process, a pivotal shift that began with adopting ISO 56002.” — Paul Pirie, Senior Manager, Integration and Innovation, Digital Health
